

LOW VOLTAGE POWER TRANSFORMERS

TOGETHER WE TRANSFORM
TOGETHER WE SUCCEED

TRANSFORMERS &
AUTOTRANSFORMERS

20 VA to
1500 kVA

RANGE OF PRODUCTION

REACTORS
1A to
3000A
RANGE OF PRODUCTION

FILE E225070

FILE E240443

SAC 13176.01

ISO 9001:2015

APPLICATION SECTORS

Data Centre

- ▶ Power supply for UPS systems
- ▶ Stable distribution to servers and critical equipment

Photovoltaic and Renewable Energy Systems

- ▶ Connection between inverters and internal distribution networks

Building Automation / Civil and Commercial Installations

- ▶ Buildings equipped with photovoltaic systems
- ▶ Shopping centers, hospitals, schools

Transport Infrastructure

- ▶ Railways, airports, subways (for powering auxiliary subsystems)

Manufacturing Industry

- ▶ Machinery and automated production lines
- ▶ Control and automation systems

Marine and Railway Applications

- ▶ Onboard power distribution (ships and trains)
- ▶ Designed for critical and demanding environments

Food and Chemical Industries

- ▶ Onboard power distribution (ships and trains)
- ▶ Designed for critical and demanding environments

Machine Tools and Electrical Control Panels

- ▶ Voltage adaptation for internal panel devices

NEW FRONTIERS IN ENERGY EFFICIENCY

In partnership with a leading provider of magnetic cores, LTC Legnano Teknoelectric Company S.p.A., a global leader in the production of magnetic cores and located just 5 km from our company, we are opening new frontiers in energy efficiency for low-voltage transformers designed for data centre. By combining cutting-edge technology with a shared vision for sustainability, we deliver high-performance solutions that meet the most demanding industry standards.

Through close collaboration with our partners and engineering teams, we are continuously innovating to provide tailored, energy-efficient products that support a greener and more cost-effective future. Our expert engineers work hand-in-hand with clients to optimize designs, ensuring that every transformer not only meets but exceeds the evolving needs of modern data center operations.

TOGETHER, WE SHAPE THE FUTURE
OF ENERGY-EFFICIENT SOLUTIONS,
ONE TRANSFORMER AT A TIME.
